Environmental Policy

Gillett Morrissey Limited provides construction and refurbishment services to the construction and leisure industries, working within commercial shopping centres, private hospitals and entertainment venues. The Company recognises the requirements for an Environmental Management System and Site Waste Plan and is committed to pursuing best environmental practice whenever and wherever practical. Furthermore, the Directors are committed to imposing the regulations and systems on Subcontractors, Suppliers and associated Consultants whenever and wherever practical.

Gillett Morrissey Limited will therefore:-

- Regularly review its own energy, fuel and stationery usage and investigate ways in which to reduce consumption.
- Regularly review its management of waste.
- Promote the improvement of activities carried out by Sub-contractors, Suppliers and associated Consultants, which have an impact on the environment.
- Meet current legislative requirements and wherever possible, go beyond these requirements.

In line with these principles, Gillett Morrissey Limited has established the following objectives:-

- To save energy by recycling waste, reducing paper dependency, providing energy efficient mechanical and electrical fittings and manage energy consumption.
- Work with our clients and suppliers to achieve sustainable design solutions that offer energy efficiency, use renewable resources and use local and recycled materials where appropriate.
- Develop and implement practices that prevent pollution and encourage responsible use of resources efficiently, minimise the detrimental impacts that our activities could have upon the environment.
- To reduce fuel consumption by purchasing diesel cars and vans, use of public transport and working from home when possible with flexible working times.
- To include clauses, wherever possible, in Tender and Contract documents prepared by Gillett Morrissey Limited which impose compliance with site waste management regulations on Sub-contractors, Suppliers and associated Consultants.
- To continually seek information on technological advances and above all, be informed.

- Continuously improving our environmental management systems and performance.
- One of our management objectives is to refurbish our main office (over time) to introduce water saving devices, energy efficient sensor controlled lighting and energy efficient heating systems all with the view to reducing our carbon footprint.
- Fully communicating our environmental policy to our employees and any other interested parties.
- Providing full training, instruction and supervision for all our staff, together with adequate instructions and supervision of any Sub-contractors working under our direction.
- Gillett Morrissey Limited management will review this environmental management system policy annually and when any significant changes to the Gillett Morrissey Limited's environmental aspects and impacts occurs.
