

GILLETT MORRISSEY

# Gillett Morrissey Washroom refurbishment

Gillett Morrissey is an Essex based team of experienced and skilled craftsmen with a real commitment to both quality and customers. Our simple ethos is that we work for the client, not the other way round.

The refurbishment and redevelopment of the washroom in this case study was a complex project. We provided a full design, specification, project management and construction all in-house. We worked closely with the client to ensure that we fulfilled their requirements, this included the design and manufacture of bespoke fixtures and furniture items which were not part of the original scheme.

# Gillett Morrissey Washroom refurbishment

We appreciate both the financial and environmental benefits of reducing consumption of resources and actively seek alternative options and make use of recycling initiatives wherever practical. As a company we seek to reduce our impact on the environment through the adoption of a sustainable procurement policy with selected suppliers. We have established positive links with a number of our suppliers that complement our own attitudes with regard to the environment and social responsibility.

# Gillett Morrissey Washroom refurbishment

For this project our architects, specialist suppliers and contractors enabled the refurbishment to progress with careful consideration to the environment and to aid an overall sustainable programme. We were able to reuse some existing materials and finishes and source locally reclaimed materials. We also incorporated low energy lighting, water saving sensor flushing equipment and taps, waterless urinals and foam soap dispensers. All of this provides cost savings, promotes a refreshing hygienic friendly washroom experience and assists to reduce the impact on the environment.

# Gillett Morrissey Washroom refurbishment

The refurbishment of this third phase was completed in 10 weeks which was two weeks early. Our experience and skills working on similar projects enabled us to deliver the work on budget and on time, added to this our flexibility enabled us to incorporate additional specialist items outside of the original programme and complete this project to the highest possible standard.
